BUYING OR SELLING A HOME

If you are buying or selling a house, certain arrangements must be made with respect to utilities. Most companies require that these arrangements be made at least 5-7 days before closing of your sale/purchase.

If you are a Seller, arrangements must be made to read meters and/or disconnect service and provide an address for final billing.

If you are a buyer, arrangements must be made to take over services and/or arrange connection of such things as telephone or cable and provide an address for future billing.

These services can be done over the phone, online, or in some cases in person. Have your new address available at this time.

We have listed some of these services below to help you at the busy time of selling or buying ; or you can go online to our website at <http://www.vermeerlaw.com/> and go to the Real Estate heading and choose "Closing Contacts"
